

ABOUT ME

I am a Fullstack Developer and Technical Project Manager focused on building practical digital solutions for businesses.

I work closely with stakeholders to understand their needs, simplify workflows, and transform business processes into web and mobile applications.

My experience covers the full development process, from UI/UX design and system development to testing, deployment, and user implementation.

I work primarily with TypeScript, Next.js, NestJS, Prisma, PostgreSQL, Firebase, Flutter, Docker, CI/CD and many more, while also supporting project planning, technical consultation, and user training.
